**VERSION WITH MARKINGS TO SHOW CHANGES MADE**

**In the claims:**

Please cancel claim 1.

Please add claim 1 as follows:

**RECEIVED**

AUG 19 2004

Technology Center 2100

2. (New) An apparatus for electronically delivering a document to a receiving system over a network, comprising:
  - a server system connected to the network and storing digital information received over the network; and
  - a sending system connected to the network transmitting digital information to the server system, the sending system optionally sending a notification to said receiving system;
  - a receiving system that communicates with the server system to determine when digital information in whole or in part is available;
  - and in which server system provides any part of the digital information transmitted by the sending system to the receiving system as a random access resource, where said receiving system can access any available part.
